

# The Nathan Kaufman Timely Topics Lecture

The Education Committee established the **Timely Topics Lecture** in 1982 at the suggestion of Dr. Nathan Kaufman. It was initially conceived as a lecture by a prominent individual in the field of pathology to address a “timely topic” but has evolved into a sophisticated presentation, generally by a clinician or researcher, whose integrated relationship with pathology moves the discipline forward with contemporary ideas, innovative methods, and futuristic technology. This lecture is regarded as an honor within the USCAP sphere.

The lecturer should be well recognized and respected within the medical community, in general, and by the pathology community; he/she should be capable of giving a lucid and erudite lecture relating to topics of contemporary interest. The lecture is presented during the Annual Meeting of the Academy.

In 1999, the Executive Committee and Board of Directors of the United States and Canadian Academy of Pathology chose to honor Dr. Kaufman by renaming this lecture **The Nathan Kaufman Timely Topics Lecture**. This action was taken in recognition of his distinguished service and invaluable contributions to the Academy, including: prolonged service as first full-time Secretary-Treasurer of USCAP; founding Assistant Editor of *Laboratory Investigation* and founding Editor of *Modern Pathology*; institution of the Diagnostic Pathology course; facilitation of separate incorporation of USCAP and establishment of its Bylaws; formulation of guidelines and procedures for Companion Societies meetings; supervision of lot purchase and construction of a permanent office building for the Academy; establishment of policies and procedures for operations, objectives for educational offerings and terms of reference for the various committees.

## Selection Process:

**The Nathan Kaufman Timely Topics Lecturer** is chosen by the President-Elect and approved by the Executive Committee at its Interim Meeting.
